

## BASIC INFORMATION

### Stainless steel bath door:

- can be used as an opening cover for various building openings, penetrations and manholes,
- they consist of a frame and a door leaf that can be completely removed, which does not limit the handling space,
- they are made of high-quality stainless-steel DIN 1.4301 with a brushed surface,
- are available in five sizes (150x150, 200x200, 200x250, 200x300, 300x300 mm).

### Installation:

The door frame is equipped with perforated mounting strips, behind which it is possible to install them into the building opening using screws, sealants, plaster, etc.

The door should not be placed in an environment where there is a higher concentration of aggressive chemicals such as chlorine, ammonia, road salt.

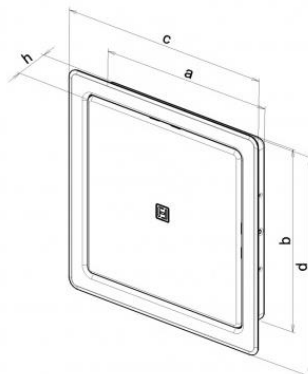

## FEATURES & BENEFITS

- minimalist design,
- high-quality workmanship guaranteeing a long service life,
- weather-resistant,
- opening with a flat screwdriver,
- simple installation and easy maintenance,
- The design of the door does not disturb the surrounding design.
