

BASIC INFORMATION

The wall-mounted axial fan is designed especially for ventilation of rooms with higher humidity. It is equipped with a gravity louver that prevents the reverse flow of air, and at the same time does not obstruct the natural flow of air through the fan, similar to a gravity ventilation grille. This also improves the ventilation of the room. It is especially suitable for exhausting bathrooms, kitchens and other areas, wherever there is a risk of reverse draft, penetration of unpleasant odours from other households of the house connected to a common ventilation shaft.

Installation:

AV PRO fans are installed in ducts of the appropriate diameter. Connection to the electrical installation must be carried out by qualified personnel – see installation instructions.

FEATURES & BENEFITS

1. Connection to pipes pr. 100,125,150 mm
2. Small footprint
3. High protection IPX4
4. Temperatures from -20 °C to 40 °C
5. Plain bearings
6. Thermal protection up to 125 °C
